

# REFUGE RECOMMENDATIONS

for  
*Insect Resistance Management (IRM)*

Growing hybrid seed corn with YieldGard® Corn Borer, YieldGard® Plus, YieldGard VT Triple®, Agrisure® CB/LL, Agrisure®GT/CB/LL, Agrisure® 3000GT, Herculex® I, Herculex® XTRA, and LibertyLink® as well as those “stacked” with Roundup Ready® Corn 2 requires an Insect Resistance Management (IRM) plan.

The key component in an IRM plan is the refuge. In an effort to help with your IRM plan, Doebler’s has matched various brands with selections that can be effective as a refuge. Please review the characteristics of each in the following pages of the *quick* Guide to find the best choice for you.

**Please note: the letter “W” appearing at the beginning of a brand name refuge corn, as in W302GR, indicates that it has been treated with either Poncho® 1250 or Cruiser® 1250.**

\*RPM™ brand distributed exclusively by Doebler’s.  
 \*\*All hybrid seed corn brand names are trademarks of Doebler’s PA Hybrids, Inc., unless otherwise noted.  
 \*\*\*TRAIT characteristics include **YGCB** (YieldGard® Corn Borer), **YGPL** (YieldGard® Plus), **YGVT3** (YieldGard VT Triple®), **RR2** (Roundup Ready® Corn 2), **LL** (LibertyLink®), **HX** (Herculex® I), **HXT** (Herculex® XTRA), **CB/LL**, **GT/CB/LL** and **3000GT** (Agrisure®) and **BMR** (Brown Mid-Rib).
